Dear people

VIDEO NOU is operating again. We are working hard to build up a Community Video Service in Barcelona. This project facilitates the use of portapacks and ensure the post production and the supporting structures.

From 78 we received no grant aid for this project. The amount of time spent on writing grant applications and associated material is out of all proportion to the results achieved.

Nevertheless, we received private donations of equipment and also promised support from the City Council for running costs for a 4-month period of 198. Unfortunately, in those years it has proved impossible to find any source of equipment funds, other than a cultural foundation who will pay us 1/3 of global cost. We have to ask more and that takes most of the time and obviously our video work should have priority.

We are currently engaged in commercial works to finance our selves, also we collaborate with the Architectural School; amongst others works we have helped to train this year: students of art in Bilbao and a journalist group that is going to work with video in Nicaragua.

Maybe later on we can send you some article for the Video Guide, if you can translate it. Have you received the Video Nou dossier 1978 ?

We received a very interesting information from Communications of Canada.

Our equipment now:

I portapack Sony 3420 AV
I Sony deck 3620 AV Recorder
I Sony deck 3670 AV Editor
I Sony deck 2100 CV
I VCR N 1500
I 3/4 " U-Matic VO-1810 PAL/ NTSC
I Monitor/TV receiver trinitron 18" Sony
I B/W Video Camera AVC 3250
I B/W Video Camera CVC 2100
